# OMEGA ROOFINGS

Omega home decors is one of the largest wholesale and retail distributors of ceramic roofing tiles in Kerala, India. Clay tiles are produced by baking moulded clay. The density of the clay is determined by the length of time and temperature at which it is heated. The colour of the clay tiles ranges from shades of white, yellow, orange and brown. The most commonly used clay colour is Terra-Cotta. Another alternative to these natural earth tones is to add enamels to the tile and make any colour of roof tiles. This process is called "Ceramic" and consists of spraying enamel over the tile before baking it. High temperatures of the kiln permanently bond this colour to the clay tile so it will not peel or fade. As a result there are a wide variety of tile profiles, styles and colours. Because clay tiles are made from natural earth-derived material, they are environmentally friendly and easily recycled. Clay tiles are resistant to strong winds and cannot be destroyed in a fire. Because of the way they are shaped clay tiles protect the underlayment of your roof, and isolate the heat or cold from being transferred to your home.

## Ceramic Roofing Tiles

# FEATURES

**Water  
Resistant**

**Corrosion  
Resistant**

**Pressure  
Resistant**

**Sound  
Insulation**

**Anti-  
Seepage**

## ASA-UPVC Roofing Sheets

# FEATURES

**Excellent  
Waterproof**

**Colour  
Lasting**

**Fire  
Resistant**

**Self-cleaning  
Performance**

**Environment  
Friendly**

Excellent Anti-Load Performance, Good Sound Insulation, Good Thermal Resistance, Volume Stability, Excellent Insulating Property, Excellent Heat Resistance, Excellent Corrosion Resistance, Easy to Install

## Stone Coated Roofing Tiles

# FEATURES

**Fire  
Resistant**

**Iron  
Resistant**

**Stone  
Coverage**

**Good  
Durability**

**Low  
Maintenance**
